

## **On behalf of the Seekonk Fire Department we want to remind you**

During this storm event, it is important to keep in mind the hazards of carbon monoxide buildup, exposure and poisoning:

- Keep dryer exhaust vents open and unblocked by snow.
- NEVER use a generator indoors or in an enclosed, unvented space.
- NEVER run a vehicle inside a closed or unvented garage
- While running a vehicle outside, make sure the exhaust pipe is not buried by snow
- Try and keep gas meters free and clear of snow (unburied)
- NEVER leave a portable heater or candles unattended (pets are curious and cause devices to tip and become a fire hazard)
- Make sure your smoke detectors and carbon monoxide detectors are in working order (and have batteries in them)
